- Section A – A mixture of multiple-choice questions and short answer questions. These all need to be answered.

The duration of this assessment is of 1 hour and the pass mark is that of 45%.

Module 2 Learning Outcomes – Carpentry Tools and Equipment

<ul style="list-style-type: none">✓ Comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations✓ Comply with organisational policies and procedures, including quality requirements✓ Manage safely and effectively the use of tools, plant and other equipment✓ Carry out tasks to optimize energy conservation when using tools and equipment	<ul style="list-style-type: none">✓ Identify and select the correct hand tools for the given task✓ Carry out tasks using basic hand tools safely and appropriately✓ Maintain equipment in accordance to manufacturer's recommendations and/ or organisational requirements.
--	---

Module 2 Assessment: The assessment will be divided in a written assessment and a practical assessment.

- Written assessment – Multiple-choice questions. These all need to be answered.
- Practical assessment - One hands-on question.

The duration of the written assessment is of 1 hour and the pass mark is that of 45%. The practical assessment is spread over 2 hours and the pass mark is that of 45%.

Module 3 Learning Outcomes – Handling of Carpentry Materials

<ul style="list-style-type: none">✓ Locate, interpret and apply relevant information, standards and specifications✓ Comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations✓ Comply with organisational policies and procedures, including quality requirements✓ Ensure safe and effective use of tools and equipment	<ul style="list-style-type: none">✓ Collaborate and work effectively and safely with others at the place of work✓ Ensure safe handling by providing quick access and use of material✓ Ensure that timber is correctly classified as either a hard wood or a soft wood✓ Choose timber for a task on the basis of its type, characteristics, uses and limitations
---	--

Module 3 Assessment: The assessment will be divided in a written assessment and a practical assessment.

- Written assessment – Multiple-choice questions. These all need to be answered.
- Practical assessment – One hands-on question.

The duration of the written assessment is of 1 hour and the pass mark is that of 45%. The practical assessment is spread over 3 hours and the pass mark is that of 45%.

Module 4 Learning Outcomes – Manufacture Joinery Components

<ul style="list-style-type: none">✓ Carry out tasks in relation to components of joinery and unit products processes✓ Identify construction and assembly method and process sequences✓ Comply with OHS regulations applicable to workplace operations✓ Be responsible for the organisational quality procedures and processes applied within context of manufacturing components for joinery units✓ Select the appropriate machines and materials	<ul style="list-style-type: none">✓ Ensure the correct set up of machines and their applications safely and correctly✓ Ensure appropriate processes, tools and equipment to be used for hand application work✓ Carry out tasks using portable power tools safely and correctly✓ Identify typical faults and problems that occur and take the appropriate course of action.
---	---

Module 4 Assessment: The assessment will be divided in a written assessment and a practical assessment.

- Written assessment – Multiple-choice questions. These all need to be answered.
- Practical assessment – One hands-on question.

The duration of the written assessment is of 2 hour and the pass mark is that of 45%. The practical assessment is spread over 2 hours and the pass mark is that of 45%.

Module 5 Learning Outcomes – Set Out and Assemble Furniture

<ul style="list-style-type: none">✓ Apply organisational quality procedures and processes within context of manufacturing and assembling fitments✓ Select and use the appropriate setting out techniques, tools and equipment✓ Carry out tasks correctly by applying details and dimensions to make set-out for fitment✓ Ensure clear details of sectional material and method of joining components on set-out is used at the place of work	<ul style="list-style-type: none">✓ Identify details and specifications of nominated fitment to be constructed✓ Ensure components and manufacturing processes is carried out safely and efficiently✓ Select the appropriate processes, tools and equipment for assembling components✓ Identify typical faults and problems that occur and choose the correct course of action to rectify them.
---	---

Module 5 Assessment: The assessment will be divided in a written assessment and a practical assessment.

- Written assessment – A mixture of multiple-choice and short answer questions. These all need to be answered.
- Practical assessment – One hands-on question.

The duration of the written assessment is of 2 hours and the pass mark is that of 45%. The practical assessment is spread over 2 hours and the pass mark is that of 45%.

The Malta Further and Higher Education Authority (MFHEA) deems this certificate to be at Level 2 of the Malta Qualifications Framework and the European Qualifications Framework for Lifelong Learning. This course comprises study modules to which a total of 8 ECTS points are assigned.
